

NIAGARA
CONSERVATION

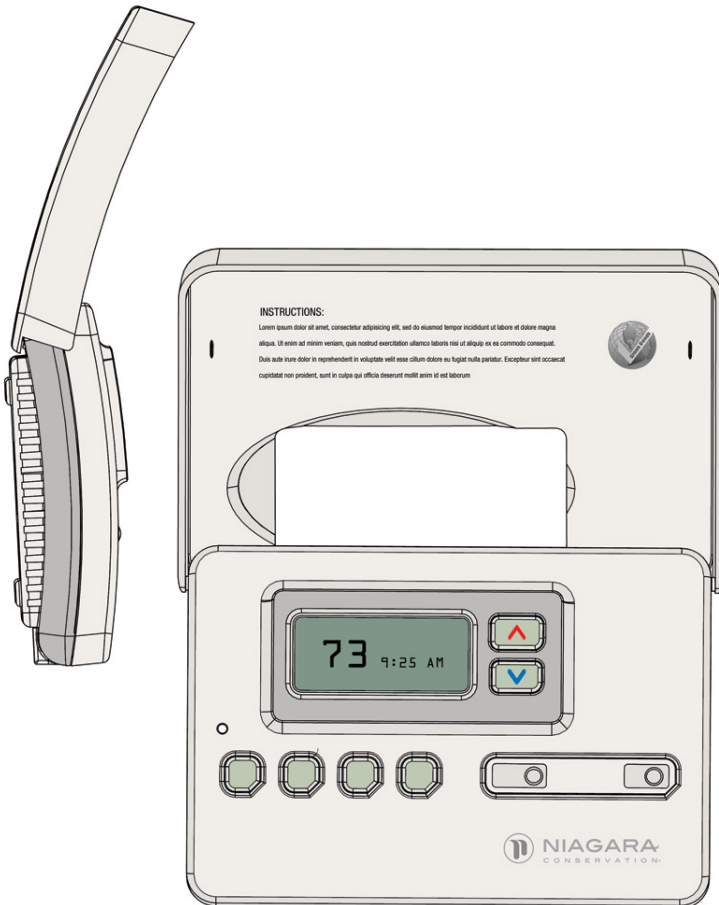

ECO-IQ™ Programmable Thermostat

ENERGY STAR® programmed thermostats, when used properly, are extremely energy efficient and can save consumers as much as 20% - 30% on heating and cooling costs.

The ECO-IQ™ programmable thermostat by Niagara Conservation has a user-friendly interface, temperate accuracy, and ability to save money and promote energy conservation. ECO-IQ™ features a digital programmed lock, making this a tamperproof device that ensures that only authorized changes are made to the thermostat.

The ECO-IQ™ is preferred by the professional installer with fewer callbacks and all the bells and whistles.

Item#: **N9195**
