

FRESH VENTILATORS

The **Fresh 80/100** provides fresh air from outdoors and then mixes it efficiently with indoor air. This is accomplished with either mechanical exhaust ventilation or self-induced air supply. The Fresh 80/100 features adjustable air flow, insulation to eliminate condensation and reduce sound penetration, and dust and insect filters. The result is a comfortable draft-free living environment.

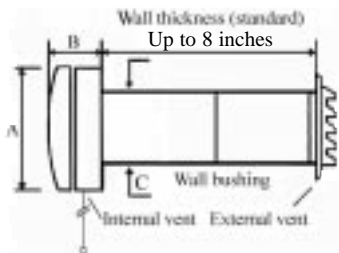

A Fresher Indoor Environment in Any Weather

FEATURES:

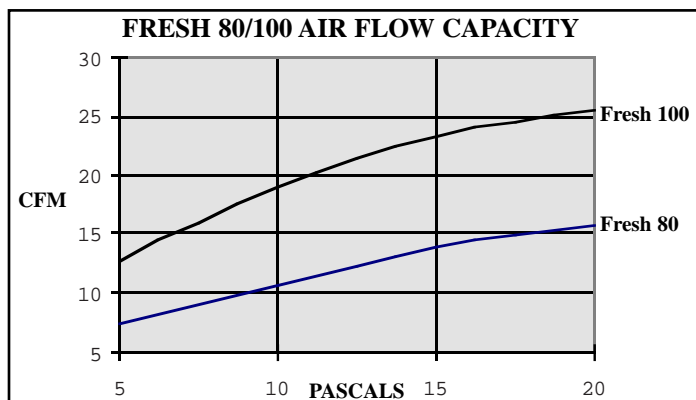

- *Draft-Free...Results in a more comfortable environment.
- *Speedy Installation...Holes needed are standard drill sizes.
- *Dust and Insect Filter...Easy to remove and clean.
- *Adapted for Use by the Handicapped...Can be open or shut from a wheelchair or bed.
- *Protection from Condensation...Made of plastic (far less condensation prone than metal) w/ extra insulation.
- *Sound Reduction...Sufficient for normal living conditions.
